assistive technology catalogue

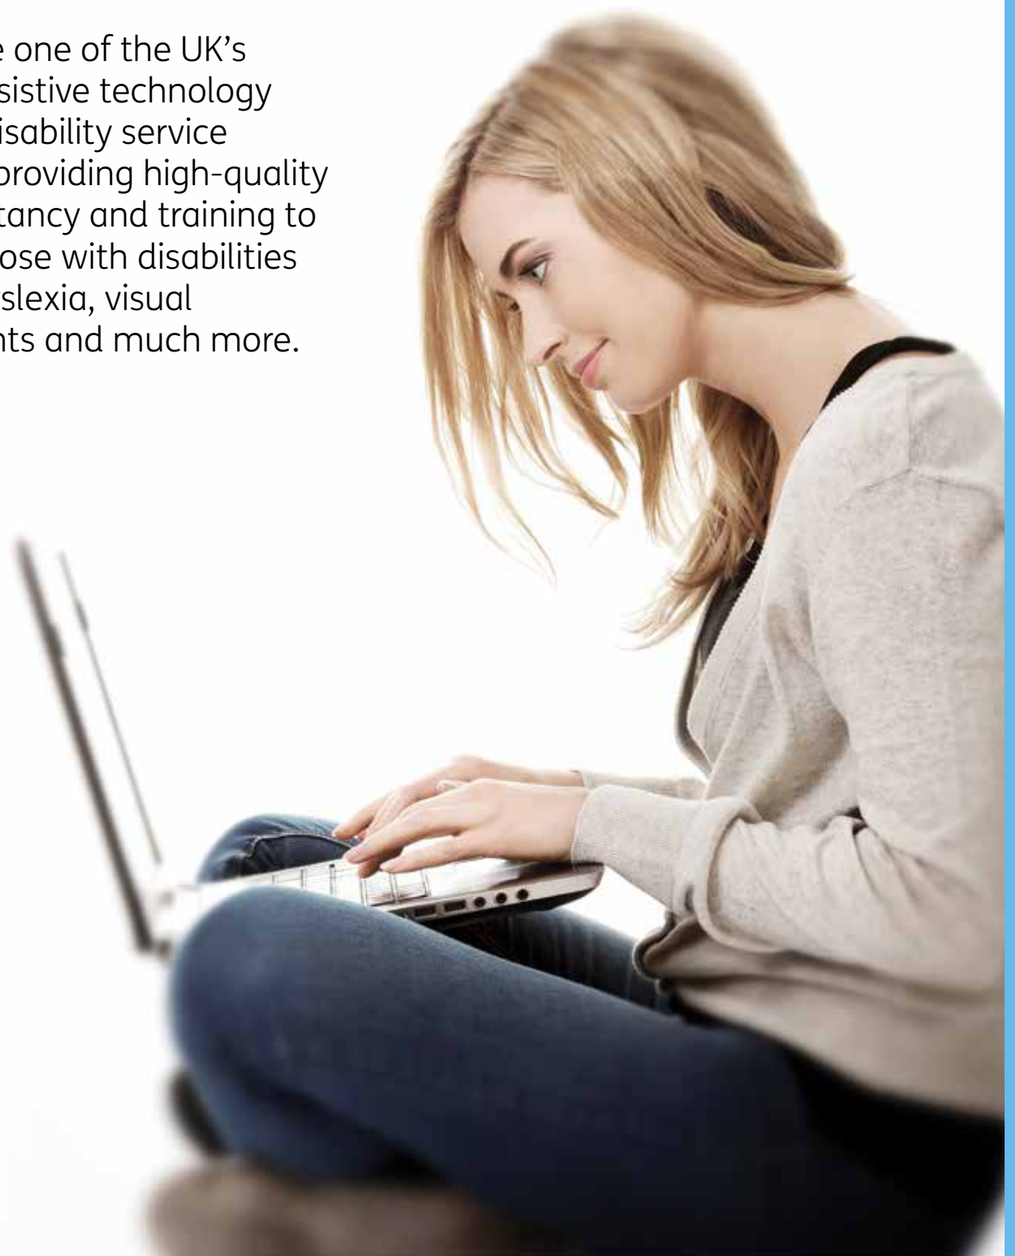
for workplace and education

www.iansyst.co.uk

Welcome to the Assistive Technology Catalogue 2016

Specially selected products and services designed to support you.

iansyst are one of the UK's leading assistive technology (AT) and disability service suppliers, providing high-quality AT, consultancy and training to support those with disabilities such as dyslexia, visual impairments and much more.



Who do we work with?

Education

We are well established Disabled Students' Allowance (DSA) suppliers, supporting thousands of disabled students each year who are undertaking their studies in Higher Education. In 2015, we launched a brand new online quoting portal for DSA Assessors to use. To find out more please get in touch.

We also work closely with schools, colleges and universities, providing competitive site licences for the latest AT software – find out more about how our site licences can help your students on page 56 .

Workplace

Re-adjust is our complete accessibility solution for workplace organisations, helping employers' support their disabled employees and bring inclusivity to the workplace. We have worked with central and local government, FTSE 100 organisations, banks and financial institutions, councils and some of the most well-known corporations in the world. Our simple four-step solution incorporates consultation, implementation, training and support to provide full disability support in the workplace. You can find out more about Re-adjust on page 54.

We are also well-established Access to Work (AtW) suppliers, supporting thousands of disabled individuals achieve their potential at work.

Individuals

Our online shop, www.dyslexic.com, provides all of the latest assistive technology software, hardware and apps at fantastic prices.

BG2016

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.

Dragon Professional Group

Dragon Professional Group is the latest enterprise-ready speech recognition solution and includes Dragon Professional speech recognition software and the Nuance User Management Centre. It allows organisations to deploy Dragon to multiple desktops so employees can dictate their work and navigate their computer, with enterprise-wide customised commands or words. Contact us for more information and prices.

Dragon Anywhere

Dragon Anywhere allows users to dictate and edit documents of any length by voice on their iOS or Android device quickly and accurately. The app is synchronised with your Dragon desktop, allowing users to complete work using their customised words and commands, whether they are on the road or in the office.

Dragon NaturallySpeaking Premium

£116.65 + VAT

Dragon NaturallySpeaking Premium speech recognition software has been designed to support those who have difficulty in producing written work. It allows users to dictate their ideas, creating written work up to 3 times faster than if they had typed. Navigate your computer using your voice with the ability to launch applications, select menu items, create and send emails and more.

SKU Number: DPM-13-01

Dragon Professional Individual

£233.33 + VAT

Dragon Professional Individual speech recognition software allows professionals in the workplace to dictate their ideas, creating written work up to 3 times faster than typing. Users can create customisations to shortcut repetitive processes (for example, inserting signature) and navigate their computer with ease.

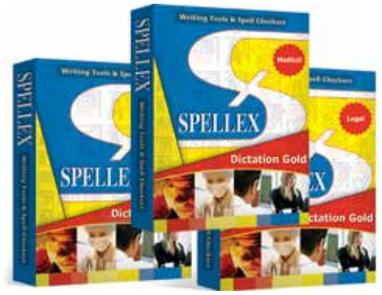
SKU Number: DPI-V14-01

Dragon for Mac

£116.66 + VAT

Dragon for Mac speech recognition software has been designed to support those who have difficulty in producing written work and allows the user to dictate and edit documents using their voice. Launch applications, select menu items, search the web, create and send emails, and more, all by voice.

SKU Number: DDM-5-01



Spellex for Speech Recognition

Spellex Dictation Gold provides specialised vocabularies for programs such as Dragon and Microsoft. The Spellex program provides correct spell checking and conversion of speech to text for studies such as medicine, law, veterinary medicine, and bioscientific/engineering. This program improves spelling, writing, reading, and comprehension, as well as improving accuracy and self-confidence.

Speech Recognition

Andrea WNC-1500 Wireless Stereo Headset

Best Seller

£69.00 + VAT

This wireless headset with noise-cancelling microphone and digital enhancement is suitable for use with speech recognition software such as Dragon. It delivers exceptional voice recognition performance with an excellent 5 Dragon voice recognition rating awarded by Nuance.

SKU Number: 12156

Andrea SB-805B SuperBeam Cans Headphones

£50.00 + VAT

The SuperBeam headsets deliver hi-definition sound with digital noise-cancelling technology. The integrated array microphone system provides binaural 3D surround sound recording which is great for recording live entertainment, music, lecture and event environmental sound samples.

SKU Number: 13241

Andrea NC-181VM USB Headset

£39.00 + VAT

This high-fidelity monaural headset with noise-cancelling microphone technology is suitable for use with speech recognition software such as Dragon and has received the highest voice recognition industry rating.

SKU Number: 7830

Andrea NC-185VM USB Headset

£49.00 + VAT

This high-fidelity monaural headset with noise-cancelling microphone technology is suitable for use with speech recognition software such as Dragon and has received the highest voice recognition industry rating.

SKU Number: 8781

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.

Sennheiser Telephony Bundle

£169.00 + VAT

This advanced bundle allows you to switch between using a headset for speech recognition software such as Dragon, and using the telephone. It includes Sennheiser Telephony headset, Sennheiser UI760 universal amplifier box and connector cables.

SKU Number: SENNTB

Savi Go Wireless Headset

£79.00 + VAT

This wireless headset allows you to seamlessly switch between calls on your mobile phone and those received through your PC. It features an extended boom and noise-cancelling microphone to optimise communications in busy environments.

SKU Number: 10173

Plantronics 400

£29.00 + VAT

This high-quality noise-cancelling headset is suitable for making internet calls, using with speech recognition software such as Dragon, listening to music, podcasts and much more.

SKU Number: 9239

Olympus ME34 Compact Zoom Microphone

£39.00 + VAT

This directional microphone is useful for recording a particular voice or signal as it limits interference from nearby sound sources, for example, recording a keynote speaker at a conference without recording conversations from other attendees.

SKU Number: 12675

What's new from Claro?

Claro Software is excited to announce new services, apps and updates to ClaroRead and ClaroRead Cloud.

ClaroRead for Windows and Mac

The latest ClaroRead for Windows provides the same easy-to-use but powerful speech, spelling, and prediction features it's always had. We've added some extras to make it even more useful for students and other learners:

- Since being the first to introduce the Daniel voice to the UK , we've always prioritised voice quality and choice: users can now choose **to download any of 80 voices,** including the latest British English Kate and Oliver, for Windows or Mac OSX – all included within the ClaroRead single license price.
- Students increasingly want to record lectures, review notes in audio form, or take their own dictated notes. ClaroRead for Windows PC now includes our **Claro AudioNote** application, letting you record straight into PowerPoint, Word, or as a regular audio file. You can import recordings with bookmarks from dedicated audio recorders
- ClaroRead users can download a **second copy of ClaroRead** for a second machine. You can even get ClaroRead for Mac if you have updated from Windows PC, all free of charge.
- Our new **ClaroRead Chrome Extension** adds speech with highlighting to any web page you visit, including Google Docs. You can also tint any web page with the colour that suits you for easy reading. Available for Chromebook, Windows, or Apple Mac.

ClaroRead Cloud for individuals

Any ClaroRead user can sign up for our new ClaroRead Cloud service to get access to extra downloads and services:

- **With ClaroRead Cloud OCR** (Optical Character Recognition) web service you get high-quality OCR all from any phone, tablet or laptop. Convert image files to fully accessible PDF using your tablet. Take a picture of a page with your phone, convert it to accessible text via the ClaroRead Cloud OCR - and then have it read back using text to speech. Document conversion on Windows, Mac, Android, iOS and Chromebook.
- **ClaroSpeak and ClaroPDF Apps** continue to be popular on iPad and iPhone – and are currently still available free for qualifying ClaroRead orders.
- **ClaroSpeak Web,** a cross-platform text notepad app with highlighting speech, image to text OCR, Dropbox, Google Drive and Docs integration, and word prediction. Available for Windows, Mac, Android, iOS and Chromebook.

NEW IN THE APP STORE:

Claro ScanPen!

Super-simple scanning and speech for exams and quick document reading!

Download on the App Store

www.clarosoftware.com

What's new from Claro?

ClaroRead Cloud for organisations

Claro offers an accessible document conversion web service across sites and organisations, with ClaroRead Cloud OCR. You can create accessible PDFs, or convert images into Word documents, from any phone, tablet or desktop, and access text-to-speech services too!

A subscription to ClaroRead Cloud OCR service gives you thousands of pages per month of OCR (Optical Character Recognition) conversion through our ClaroRead Cloud OCR website: just take a photograph or select a PDF or image file and get back text, PDF or Word. All your staff or students can use the subscription on their personal or work devices. With lots of options for affordable annual subscription, it gives you organisation-wide capacity and compliance for a great price.

Your students or staff also get cross-platform text-to-speech with **ClaroSpeak Web.** Speech with highlighting, screen tinting, speaking dictionary, Google Drive, Docs and Dropbox integration, and all working on Windows, Mac, Android, iOS and Chromebook.

Network licences

Of course, you can always upgrade to a networked site licence of ClaroRead for Windows or Mac OSX if you want the full power of our native desktop applications. We can provide easy-to-install bundles of ClaroRead and our other software to suit your organisation and licensing requirements, just get in touch!

Notes:

- ClaroRead Cloud services are available for one year after registration with ClaroRead. Renewal options will be available each year.

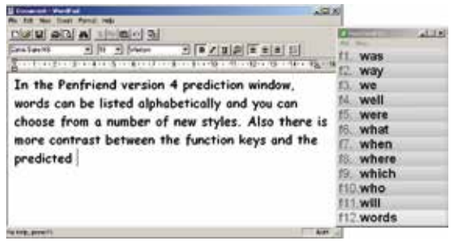
ABBYY FineReader®

£54.17 + VAT

ABBYY FineReader® is optical character recognition (OCR) software that converts paper and image documents into editable formats such as MS Office or searchable PDF's. Used with text-to-speech software, it can read aloud previously inaccessible files i.e. locked images or printed documents.

SKU Number: 13338



Penfriend

£48.00 + VAT

Penfriend is a powerful screen reader that helps users to write faster by predicting the next word they want to use. It also provides speech feedback and a personalised on-screen keyboard for different languages.

SKU Number: 15602

Site licences available

Training Portal

by iansyst

Step-by-Step Information Sheets and Videos

The online training tool contains informative PDF and videos which give step-by-step instructions on how to use your assistive technology. Our Assistive Technology Experts have created simple and easy-to-follow instructions that tackle common difficulties such as creating custom commands in Dragon NaturallySpeaking, using the screen masking tool in Read&Write, or editing audio in Sonocent Audio Notetaker.

Access to the Online Portal 24/7

Unlike other forms of assistive technology training, the iansyst Training Portal is an online based tool which means users are able to access the portal at any time. Documents can also be saved to your device so that if internet access is not always available, you can still access the information that you need.

Great Addition to One-to-One Training Sessions

The iansyst Training Portal subscription is a great way to accompany one-to-one training sessions with our Assistive Technology Experts. It is an ideal training tool for those with dyslexia and poor memory retrieval. The information sheets and videos are an online refresher, available as and when they are needed.

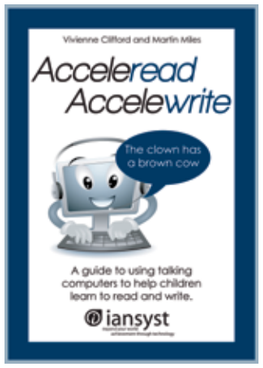
Reading and Writing

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.



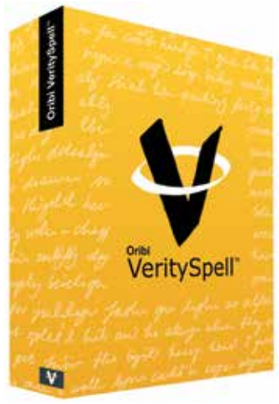
AcceleRead AcceleWrite

£49.95 + VAT

AcceleRead AcceleWrite is a substantial electronic resource for teachers and parents, providing a teaching guide on how to use a computer with text-to-speech software to improve reading, writing, spelling and listening skills of pupils who are experiencing literacy difficulties. It contains colour-coded flash cards, record sheets and blank flash cards to make your own sentences.

AcceleRead AcceleWrite is now available as an app for iOS devices and is available in 3 licences. The app productively utilises and enhances the iOS text-to-speech in order to develop an individual's memory, reading, spelling and phonological skills. To find out more, please visit www.dyslexic.com/apps

SKU Number: ARAW



VeritySpell

£39.95 + VAT

VeritySpell provides spelling, homophone and dictionary support for those who find a standard spell-checker insufficient. It can be used in virtually any application, whether composing text in Microsoft Word, writing an email or filling in a form on a web page.

SKU Number: VSP-01-2

VeritySpell

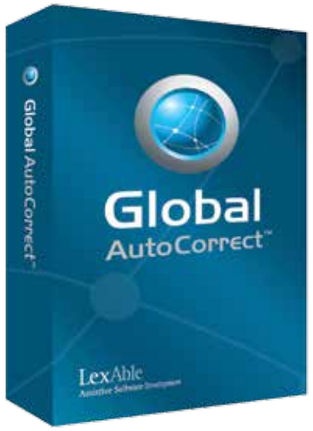
- for PC, Mac and as an add-on to Google Docs!

VeritySpell is an unique spellchecker capable of correcting serious **spelling mistakes**, mistakes involving **confusable words** and simple **grammar mistakes** in English texts.

It is specially designed for people with **reading and writing difficulties** such as **dyslexia**, and it offers much better support than ordinary, built-in spelling and language checkers. VeritySpell can be **customised** for use by anyone who needs additional spelling and language support for whatever reason.

VeritySpell can correct **serious spelling mistakes** like *inof* (enough), *citon* (kitten) and *tri* (tree) better and more efficiently than any other spellchecker. VeritySpell also helps you handle **confusable words** like *witch–which* and *their–there–they're*. Thousands of example sentences show confusable words in **context** to help you chose the right spelling.

Oribi
Download **your** trial version at
www.oribisoftware.com



Global AutoCorrect

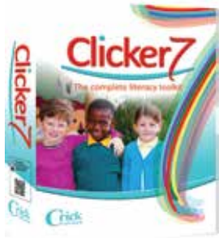
£229.00 + VAT

Global AutoCorrect automatically corrects spelling mistakes and typos in any program. It runs silently in the background, and provides millions of corrections straight out of the box. This removes the stop-start effect of correcting mistakes, and allows you to focus on your writing.

SKU Number: 13853

Clicker

£250.00 + VAT



2016 Version

Clicker is a popular literacy support software which helps users of all ages and abilities to develop their reading and writing skills. It helps every child to play an active role in their own learning and offers complete support throughout the writing process. The software allows the user to insert words or phrases into a document, as well as over 3500 curriculum pictures from the library. Clicker also incorporates learning support features such as the ability to record audio, hear sentences read aloud in a realistic voice, planning tools and enhanced word prediction.

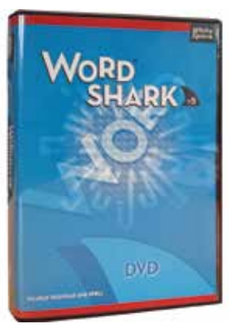
SKU Number: CLI-7-01

EB WordBanks

£59.00 + VAT

EB WordBanks sits alongside your word processor, email or the internet and consists of a grid of words and phrases. These words can be spoken aloud and inserted into your document. It is designed to support those who struggle with spelling or finding the right word to use in their text.

SKU Number: EBW-V1-01



Wordshark

£57.50 + VAT

Wordshark is designed to improve spelling, reading and motivation amongst Key Stages 1-3, as well as secondary and adult users. It includes over 55 games to reinforce reading and spelling, with variable levels and speeds to suit different ages and abilities.

SKU Number: WSH-5-01

Note-taking Support

Livescribe Echo Smartpen

The Livescribe Echo Smartpen captures handwriting and high-quality audio to help users take notes. Notes and recordings can be uploaded to your computer, where they can be saved and searched. It supports students and professionals who experience difficulty with writing notes whilst listening to lectures or meetings.

10 reasons why Sonocent Audio Notetaker is loved by students with disabilities

1 It enables them to take brilliant notes

Before using the software, just 26% of our student users* were confident that their notes captured all the important points. But now they have adopted the software that figure has soared to **90%.**

2 It's proven to raise grades

At the University of Nevada, Reno, 80% of the students who were assigned the software for note taking saw their results improve by an average of **two grades.**

3 It's simple to use

77% of students think that **15-30 minutes** of training is all that is needed to start using the software for note-taking.

4 It reduces anxiety and boosts confidence

When asked why they use the software, 52% of students said that it reduces their stress and anxiety when studying. What's more, **88%** are now confident that they can take notes independently.

5 It offers true flexibility

Students can work with **audio recordings from almost anywhere**, from recordings taken on a laptop, digital recorder or smartphone to lecture capture files and online resources.

Sonocent Audio Notetaker breaks the note-taking process into steps, so that students with disabilities such as dyslexia can take accurate, comprehensive notes. The software has already helped over **100,000** students study independently.

*"I totally love your product and have seen at first-hand the **difference it can make** to the lives of those who use it. Keep up the amazing work!"*

Kur Lewis,
Assistive Technology Trainer

*All statistics are taken from a May 2015 survey of 1,624 Sonocent Audio Notetaker users
**Sonocent Audio Notetaker for Windows features integration with Dragon NaturallySpeaking Premium and Professional versions 11 and above

6 It develops core study skills

Sonocent are focussed on **helping students study smarter**. So we have developed a process that integrates the software into their daily study practice and will improve how they take notes, revise, write essays and more.

7 It comes with the best training

From an accredited training programme, to an **online training portal** and a pool of inbuilt resources, Sonocent have worked hard to ensure students get the maximum benefit from using the software.

8 It improves with every free update

Sonocent are constantly working in the background on improvements to the software. The latest update came with a powerful toolkit for improving the quality of recordings and **integration with Dragon NaturallySpeaking****.

9 It can be used with the device in their pocket

With the free **Sonocent Recorder** companion app, students can record on the go, highlight the key information, and add photos, before sharing the file with Audio Notetaker via WiFi.

10 It's endorsed by the people who matter

The software has won three major industry awards, including a prestigious **Bett Award** in 2015. It has been implemented by some of the world's best universities, including UC Berkeley. And 81% of educators think it could raise attainment.

REDUCE ANXIETY AND INCREASE INDEPENDENCE WITH BRAIN IN HAND MOBILE SOFTWARE

Employers, schools, colleges and universities, support providers and local authorities across the UK are providing Brain in Hand software to the people they support with autism, anxiety, mild or moderate mental health difficulties, or who are recovering from brain injury.

They are seeing dramatic results:

- **Reductions in anxiety and increased independence**
- **Improved support staff efficiencies**
- **94% of people using the system report that it is having a positive impact on their life.**

Get in touch to find out how it can help your organisation and about our new support service option with The National Autistic Society.

irlen Where the Science of Colour Transforms Lives

Make Learning Easier

Help your child with dyslexia and reading problems

The IRLEN Method

Helps Struggling Students

- Tracking problems
- Skipping words and lines
- Losing concentration
- Poor comprehension
- Getting headaches, tired, and other symptoms

Improves Reading, Math, Copying, and Learning

Students experience reading, attention, and learning problems because the brain incorrectly processes what they are seeing. The Irlen Method uses coloured overlays and Irlen Spectral Filters, worn as glasses, to correct this problem. Research studies show that using coloured overlays are beneficial to readers of all ages.

Irlen Pukka Pads

£3.29 + VAT

The A4 Pukka Pads are available in a selection of colours and have been designed for those who find it difficult or distracting to write on bright white paper. They contain 50 sheets of 80gsm paper, ruler with a margin and pre-punched for 2 or 4-hole binders. Colours available: Gold, Green, Lavender, Parrot, Rose, Turquoise.

SKU Number: IRL-PUKKA

Colours available:

ClaroView

£29.00 + VAT

ClaroView allows computer users to have a virtual coloured overlay on the whole screen, with the ability to customise the colour and intensity. Users can insert underlining and coloured reading rulers, whilst also being able to darken the screen outside of the reading ruler to aid concentration.

SKU Number: 4653

Great Value

Anti-Glare Monitor Overlays

These reversible monitor overlays feature a matt side which reduces glare from your computer screen. They never blur or distort content on-screen and also help protect your computer screen from any scratches or abrasions.

£42.00 + VAT

15.6” Screen
SKU Number: 14153

£49.00 + VAT

17.3” Screen
SKU Number: 15263

Alternative Formats

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.

Dolphin Easy Convertor

£595.00 + VAT

Best Seller

The Dolphin EasyConverter allows organisations to create accessible information for people with visual impairments, dyslexia and other reading difficulties. It features optical character recognition (OCR) technology to allow users to scan paper documents. Documents can be converted into large print, MP3, DAISY, audio and Braille formats.

SKU Number: DEC-01-01

Plextalk PTR2 Daisy Player Recorder

£603.29 + VAT

This is a digital talking book recorder which has been specifically designed for people with visual impairments. The user can create DAISY 2.01, audio only, books and music CDs, as well as play DAISY titles, music CDS, audio file CDs and CF cards.

SKU Number: 13986

Victor Reader Stream

£255.00 + VAT

The Victor Reader Stream is a handheld media player for blind and visually impaired users. It plays DAISY books, MP3, MP4, EPUB and many other media formats in human-sounding voices. It also records voice and media with a built-in microphone.

SKU Number: 13018

Mouse, Keyboards & Input Devices

AirObic Mouse

£84.95 + VAT

The AirObic Mouse is a vertical mouse that has been designed to provide a natural posture for the user's hand, wrist and arm. Without gripping the mouse, the user's hands and finger stay more relaxed and comfortable, reducing aches and risk of long term injuries.

SKU Number: 11913

Accuratus Upright Mouse 2

£16.65 + VAT

The Upright Mouse is designed so that the user's arm is straight and their wrist is in a natural position. The mouse fits comfortably in the palm in an upright position and keeps the bones in the arm straight, eliminating the uncomfortable twisted position caused by standard mouse devices.

SKU Number: 12671

BigKeys Keyboard

£119.00 + VAT

The BigKeys Keyboard are the same size as a standard keyboard, have fewer keys and extra-large sized key tops (key tops are 2.5cm²). They are available with QWERTY or ABC layout, and with coloured, white or black key tops. The keyboards are also available as lowercase or uppercase letters.

BigKeys LX ABC Keyboard
SKU Number: BKK-ABC
BigKeys LX QWERTY Keyboard
SKU Number: BKK-QWE

Monster 2 Keyboard

£24.99 + VAT

The Monster 2 Keyboard is ideal for young children and is the perfect entry into computing. It features large, oversized keys grouped in different colours. There is also a high-visibility model, with large black legends against a bright yellow background, and a high-contrast model, with large black legends on a high-contrast white background.

Mixed Colours
SKU Number: MON-MIX
High-Visibility

High-Contrast
SKU Number: MON-HCO

Jelly Bean Twist Switch

£28.50 + VAT

The Jelly Bean Twist Switch offers users an alternative way of controlling a computer. It features a 6.4cm activation surface and is recommended for users who are able to access a smaller target area. Switch tops can be removed and replaced with the colour of your choice: Red, Blue, Yellow or Green.

SKU Number: 10596

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.

n-ABLER Joystick

£239.00 + VAT

The n-ABLER Joystick emulates a standard computer mouse, but with fingertip control and the need for only minimal hand movement, it reduces wrist and elbow fatigue, requires far less effort, and is less tiring. The symmetrical design enables users to work with either hand without having to angle the wrist.

SKU Number: 6638

Optima Trackball

£99.00 + VAT

The Optima Trackball has been designed to support computer users who lack fine motor control skills. By combining a smooth rollerball within a stable casing it allows users to have precise cursor control.

SKU Number: 8935

Evoluent Vertical Mouse

The Evoluent Vertical Mouse is designed to support the user's hands in a fully upright handshake position that eliminates forearm twisting, allowing a more relaxed way of working. It is comfortable to use and reduces the risk of repetitive strain injury.

£99.95 + VAT

Evoluent Vertical Mouse Right Handed Wired
SKU Number: VM4-4H
Evoluent Vertical Mouse Right Handed Small Wired

Penguin Mouse Small Wireless
SKU Number: 11290

Mouse, Keyboards & Input Devices

RollerMouse PRO 2

£179.00 + VAT

Features an ergonomic design that places cursor control just below the spacebar of any keyboard, making data entry faster, safer and more comfortable for both right and left handed computer users.

SKU Number: 9118

MouseTrapper Flexible

£284.95 + VAT

The MouseTrapper Flexible is an ergonomic, wireless mouse steering pad that is designed to relieve repetitive strain injury. It has a range of useful, programmable shortcut buttons and will provide comfort and support to computer users.

SKU Number: 12794

Microsoft Natural Ergonomic Keyboard 4000

£35.00 + VAT

This ergonomic angled USB keyboard with split keys encourages natural wrist and arm alignment for comfort whilst typing. It features customisable hot keys and a Zoom Slider to quickly zoom in and out with the touch of a finger.

SKU Number: 3469

Fujitsu Split-Keyfield Keyboard

£99.95 + VAT

The Fujitsu Split-Keyfield Keyboard is ergonomically designed and promotes the natural positioning of arms and hands to reduce the risk of repetitive strain injury. The keyboard and lateral slope can be adjusted and the alphanumeric keypad can be adjusted up to 30°.

SKU Number: 396

Ergonomics

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.

RH Logic 400

£893.00 + VAT

This ergonomic high-back chair has a lumbar pump, castors for soft flooring and an aluminium base. It can be enhanced with optional extras such as a neckrest and armrest for increased comfort.

SKU Number: R40-BG-ANH-BUS

RH Logic 300

£828.00 + VAT

This ergonomic medium-back chair has a lumbar pump, castors for soft flooring and an aluminium base. Like the RH Logic 400, it can be enhanced with optional extras such as a neckrest and armrest for increased comfort.

SKU Number: R30-BG-ANH-BUS

MicroDesk Compact

£74.00 + VAT

Designed for use with a laptop on a docking station or a confined work area. It is used to refer to paperwork or documentation that has traditionally been placed to either side of the laptop.

SKU Number: ERGOWS11

MicroDesk Standard

£80.00 + VAT

A unique solution allowing comfortable keyboarding and document reference in line with your keyboard and monitor. It has been designed for keyboard users that need to refer to paperwork or documentation that has traditionally been placed to either side of the monitor or keyboard.

SKU Number: ERGOWS10

Ergonomics

How to order

Simply note the product SKU number and visit our website **www.dyslexic.com** or call us on **0800 018 0045** for more information.

Prices are for single licences, multi-user and site licencing options are available too.

Aluforce Pro 140

£500.00 + VAT

This electronic height-adjustable desk allows you to go from sitting to standing at the press of a button. It has an adjustable height of 700-1170mm and width of 1100-1700mm.

SKU Number: AF140F12

Aluforce Pro 251 M

£1015.00 + VAT

This electronic height-adjustable desk has an additional leg for increased room and comfort. It has an adjustable height of 630-1280mm, a main width adjustment of 1180-1700mm and an extension width adjustment of 1200-1400mm.

SKU Number: TEDF3L1412

AdaptChair 630

£530.00 + VAT

This ergonomic manager chair features a seat tilt mechanism, seat slide, independent back angle adjustment, inflatable lumbar support and memory foam seat pad.

Re-adjust Disability Support Services

iansyst have been market leaders in providing accessibility and inclusion solutions for over 30 years. Using our wealth of experience and product knowledge we've empowered over 10,000 disabled individuals in the workplace to maximise their potential and increase their ability to add value for their employers.

Working with our workplace clients we launched Re-adjust, our full service workplace solutions service, in 2009. Since then we've worked with central and local government, FTSE 100 organisations, banks and financial institutions, councils, and some of the most well-known corporations in the world.

Operating at a national level, and with our partners (including Nuance, TextHelp, Claro, Connevans, Online Ergonomics and RBLI) we pride ourselves on supplying outstanding assistive technology and ergonomics, matched with the best training, consultancy and coaching.

Complete support for disabled employees

Re-adjust is the complete accessibility solution, helping organisation's support their disabled employees and bring inclusivity to the workplace. The simple four-step solution begins with analysing and finishes with complete support and reassurance.

Workplace Assessments and Reports

Our Assistive Technology Experts work with your employee to gain an understanding of their role to match specific adjustments to individual needs in the context of their job.

Assistive Technology Recommendations

Our Assistive Technology Experts will review current set-ups to ensure reasonable adjustments for disabled employees are up-to-date and ensure that the most appropriate adjustments are in place. We will recommend any assistive technology that employees could benefit from.

Disability Support and Coaching Sessions

This is a highly effective support provision, where our Assistive Technology Experts will work on a one-to-one basis with disabled staff to develop a personalised work strategy.

Call or email us to request your copy of our Re-adjust service brochure.

Phase 1 - Consultation

In the first phase, our experienced accessibility specialists will visit your organisation and recommend improvements that should be made in the way that you currently support disabled employees in the workplace. At this stage we will also highlight any additional support or training which needs to be provided to your employees.

Phase 2 - Implementation

We will advise on the different types of assistive technology available. We can provide a wide range of assistive technology software and complete the set up and installation on your individual computers or networks.

Phase 3 - Training

Arguably the most important step in providing accessibility solutions is to ensure that employees and managers are fully trained in how to use the software, how to provide training, and also how to ensure that employees feel confident to reach out when they require a little more support.

Phase 4 - Support

The final stage is one that will remain with you. We provide your organisation with all of the support you require going forward. This includes software updates, technical issues, training support – we are always here for you.

Get in touch

To find out more about our Re-adjust service and what iansyst can do to help you support your disabled employees call 0800 018 0045 or email workplace@iansyst.co.uk

Training and Support Services

Education

iansyst have been working with schools, colleges and universities across the UK for over 30 years, providing high-quality IT solutions, assistive technology, consultancy and support to assist students with learning difficulties, physical or sensory impairments.

Our Assistive Technology Experts carry out informative seminars for SENCOs, teachers and educational psychologists at our premises in Cambridge, or at outside venues as appropriate. Educational organisations find these particularly useful when new legislation or regulations are introduced, such as the SEND reform in September 2014.

DSA students benefit from our training sessions which demonstrate how to use their assistive technology software and hardware. We are able to provide both on-site and remote training to all students, and tailor the session to their individual needs.

Consultancy

Our Assistive Technology Experts can carry out a review of your establishment's assistive technology provision. We will make recommendations and give advice on how to make the best use of existing technology, highlighting any gaps and sharing best practice.

We also offer Needs Assessments for pupils or staff which is a one-to-one consultation where software and hardware solutions are explored and demonstrated.

Site Licences

All of the prices listed in this catalogue are based on a single licence. We offer site licences on our assistive technology which is a cost-effective option for organisations. This allows unlimited users so can be deployed across your whole location. Please contact us if you would like to receive a quote for your organisation.

Workplace

iansyst's Re-adjust service offers workplace organisations a wide range of training and consultancy services to support disabled employees. We are able to deliver seminars and workshops to raise awareness of dyslexia and disabilities which is important as it provides employees with an understanding of a range of disabilities, the needs of disabled people and the reasonable adjustments that can be made. We also provide training sessions to demonstrate to individuals or groups of employees how to use their assistive technology software and hardware.

Access to Work employees are often entitled to training or support sessions from iansyst. Our Assistive Technology Experts carry out sessions which ensure the employee is confident in the use of their assistive technology software and hardware, aiming to resolve any difficulties they may face.

iansyst Training Portal

The iansyst Training Portal has been developed as a support tool for students and employees to help make the most of their assistive technology products. The online training tool contains informative PDF's and videos which give step-by-step instructions on how to use your assistive technology software. It is ideal for individuals with dyslexia and poor memory retrieval as it enables them to look up information as and when they need to.

Get in touch

To find out more about our training and support services and what iansyst can do to help you support you call 0800 018 0045 or email info@iansyst.co.uk

AcceleRead AcceleWrite

AcceleRead AcceleWrite is a proven approach on how to use text-to-speech to improve literacy skills, particularly to assist with dyslexia. iansyst has now taken this programme and developed an app version for iOS devices.

Improves skills for students in KS1 and KS2:

- ✓ Reading
- ✓ Writing
- ✓ Spelling

How does it work?

- The child will read the displayed sentence until they have memorised the words and spelling.
- They tap on the screen to input the sentence exactly as it appeared to them. Each word and sentence is read aloud to help identify errors.
- This process is repeated until the sentence is correct and the child can move onto the next level.
- There are eight levels of increasing difficulty, with the ability to track progress of how many attempts were made at each level and which levels have been completed.

The theory behind AcceleRead AcceleWrite:

- The app maximises the links between letter patterns and sounds by providing visual and auditory information at the same time.
- It supports phonological processing and allows extra experiences of hearing and thinking about sounds and their relationship to letters.
